

PSY 362. Psychological Testing

S. Mason Garrison

December 14, 2020

Class Room: Canvas

Web: wakeforest.instructure.com/courses/28913

Professor: S. Mason Garrison

E-mail: GarrisSM@wfu.edu

WFU Office: GREENE 438

Virtual Office: Zoom wakeforest-university.zoom.us/my/smasongarrison

Hours: By Appointment calendly.com/smasongarrison

Course Description

This course provides an overview of the development and nature of psychological tests with applications to school counseling, business, and clinical practice. The purpose of the course is to provide students with an understanding of the principles of measurement as applied to group standardized measures of achievement, special aptitude, intelligence, personality, interests and distress for use in counseling. Format will consist primarily of lectures along with group participation activities.

Course Objectives:

- To acquaint you with the fundamental vocabulary and logic of psychological measurement and behavioral assessment.
- To develop your capacity for critical judgment of the adequacy of measures purported to assess behavior in the role of theory development.
- To acquaint you with some of the relevant literature in personality assessment, psychometric theory and practice, and methods of observing and measuring behavior.
- To instill in you an appreciation of and an interest in the principles and methods of psychometric theory in general and behavior assessment in particular.
- This course is not designed to make you into an accomplished psychometrist (one who gives tests) nor is it designed to make you a skilled psychometrician (one who constructs tests), nor will it give you “hands on” experience with psychometric computer programs. Rather it is aimed to allow you to understand the fundamental theoretical issues concerning both the psychometrist and the psychometrician.
- Because modern psychometrics and statistics may be done using open source software such as R, examples will be presented in R. Instructions for installing and using R for psychometrics are available [here](#).

Materials

Texts

Required

[1] A. Anastasi and A. Urbina. *Psychological testing*. Upper Saddle River, New Jersey: Prentice-Hall, 1997. ISBN: 0-02-303020-8.

How to use the required text: The text (Anastasi and Urbina 1997) is intended to supplement the lectures. The lectures don't follow the order of chapters in the text and the text covers some material that won't be covered in the lectures, i.e., not all the information in each chapter is perfectly pertinent to the course requirements.

Course Assignments

Tests

There will be X tests in this course. The best 2 out of 3 exam grades will be used to determine your total exam grade. You can drop any of the exams for any reason BUT YOU MUST PASS THE LAST EXAM (held at TBD on Dec TBD). If you do not pass the final exam, your score on that exam will count as one of your 2 grades. If you do pass the final exam, then the best 2 grades will be used (irrespective of your score on the final exam).

Test Dates

- Test 1: Friday, 09/25
- Test 2: Friday, 10/30
- Test 3: During Finals Week

Short Assignments

There will be three (3) short assignments in this course. These assignments will allow you to incorporate some of your own interests into the course. Such interests could be related to your career, another class you're taking, a hobby you're exploring, or some other random fancy. They will typically be approximately two (2) pages. I will provide more specific written guidelines at least two weeks before each assignment is due.

The best two (2) out of three (3) short assignments will be used to determine your total short assignments. You can skip one of the assignments for any reason. ### Short Assignment Dates

- Assignment 1: Friday, 09/18: Critique of an online personality test.
- Assignment 2: Friday, 10/16: Critique of a personality-related media article.
- Assignment 3: Friday, 11/13: Critique of a personality-related YouTube video.

Engagement Activities

There will be multiple engagement activities in this course. These activities will allow you engage with the material for each module. Details about the specific activities will be provided on canvas. Students must complete two activities per module. For students in the blended section, they can attend their weekly in-person session and count it as an engagement activity.

Course Policies

Grading Policy

Typically, an A- is defined as 90% of the highest point total in the class, B- as 80% of that total, C- as 70 and D- as 60%. I may shift these values down to provide a better fit to the actual point distribution. By scaling to a percentage of the highest point total in the class, each student has a much better chance of receiving higher grades than if no re-scaling were done. This curve can only help your grade.

The full table is provided below:

Table 1: Full Table

Letter	Cutoff
A	0.95
A-	0.90
B+	0.87
B	0.82
B-	0.80
C+	0.77
C	0.72
C-	0.70
D+	0.67
D	0.62
D-	0.60

Curve Projections

Unsurprisingly, students have many questions about the curve in this class. For tests and other assignments, I try to provide a projected letter grade. This projected letter grade is there to give you a sense of what your score *would* be if I implemented the class curve on this particular assignment. It is a projection. It is not a guarantee. These projected letter grades are not incorporated into your final grade. Trust me, you do not want me to curve by assignment.

Late Work

Be sure to pay close attention to deadlines. Unless you have a compelling reason and instructor pre-approval, there will be no make-up assignments, quizzes, tests, or late work accepted. See the policy on excused absences for specifics on instructor pre-approval.

It is the responsibility of the student to ensure that the instructor has received the assignment by the established due date and to ensure that the assignment submitted is the complete and correct version. Unless otherwise specified, all work must be submitted through Canvas.

Grading Weighting

- 200 points of your grade will be determined by two (2) tests.
- 100 points of your grade will be determined by two (2) short assignments.

- 50 points of your grade will be determined by your attendance and participation in class. Generally, ask questions and answer them.

Test Dates

- Test 1: Thursday, 10/13
- Test 2: During Finals Week, TBD

Short assignments

There will be two (2) assignments in this course. I will provide more specific written guidelines at least two weeks before each assignment is due.

Short Assignment Dates

- Assignment 1: Tuesday, 10/06.
- Assignment 2: Thursday, 11/17.

Class Presence and Participation.

In previous semesters, I have had a deliberately hardline attendance policy. In the light of the public health crisis, I have done away with this policy, as it doesn't align with my general philosophy of treating students as junior colleagues. The student who misses a class meeting is responsible for any assignments and/or announcements made.

Class presence and participation points are given to encourage your active engagement with the material. Specific instructions for engagement, can be found on Canvas. In general, you will be rewarded with a perfect score as long as you engage meaningfully and intentionally with the material and your peers.

Excused absences and extension policy

As a reasonable and empathetic human, I recognize that life happens. There will be times when your outside life conflicts with scheduled class events. These life events can be any of the obvious things (sports, religious holidays, illness, interviews, etc), but they can also be the less obvious, like spending the entire night looking for your lost pet. My general approach is to work with you. You just need to let me know ahead of time. Conflicts arising from personal travel plans or social obligations do not qualify as excused absences, unless those commitments were set before this course began. If that is the case, please let me know within the first **two weeks** of class.

Except in the case of *true* emergencies, a possible excused absence should be discussed with me as far in advance as possible and *must* occur beforehand. You should not assume that an excused absence will automatically be granted – but you may assume that I am a reasonable, empathetic person. This discussion should occur via email. If you also discuss your situation verbally, please send a summary of the discussion via email to me.

An unexcused absence will result in a zero for any graded work that should have been performed for or during the missed class.

Academic Dishonesty Policy

All work submitted for credit must be the student's own and is subject to the provisions of the Wake Forest Honor Code. Details can be found at the Student Conduct web site: studentconduct.wfu.edu/honor-system-wfu.

Unless I have explicitly stated otherwise, every assessment is closed to outside resources (including, but not limited to books, notes, phones, people). Ignorance of the honor code and assignment instructions is not an acceptable explanation and/or defense.

It is *ALWAYS* academic dishonesty to share test questions, post course materials on any third-party websites, or to work together on tests. And frankly, it is really obvious in Canvas when you work together. I literally wrote a R program that checks for working together, using a non-parametric statistic method.

Violations of this policy result in a zero for the assignment and possible additional penalties, including, but not limited to a referral to honor council, failing the class, a ban from all extra-credit assignments, and no longer being able to drop assignments.

Accommodations Policy

If you are (or become) disabled (in any capacity, permanently, or temporarily), and need accommodations in class, reading, or any other work in this course, please contact me to discuss your specific needs as soon as possible. Under the Americans with Disabilities Act, you are legally entitled to reasonable accommodations for disabilities. I will do everything in my capacity as your Professor to ensure that you receive those accommodations.

Students who need reasonable accommodations for disabilities also should contact the Learning Assistance Center & Disability Services lac.wfu.edu. These accommodations are not retroactive. Therefore, I strongly encourage you to use those accommodations. You rightfully deserve them, both in the legal, moral, and ethical sense.

Communication

You are expected to read every LMS announcement, message, and email; as well as view the media embedded within those communications. Students are expected to check e-mail on a frequent and regular basis in order to stay current with University-related communications, recognizing that certain communications may be time-critical. At minimum, you should be checking your communications within 48 hours. Ignorance of a class communication is not grounds for an excused absence or extension.

Self Advocacy

If you are struggling in this class, please talk to me. Do not assume that I know what is going on in your life. Talk to me and tell me what you need.

Grading Questions

Please send any questions about grades in writing via email within two weeks after the assignment is returned. If I erred in scoring or in calculating the grade, I will happily update the record. Otherwise, I will be most receptive toward questions framed in terms of your learning (rather than simply your performance), as research has shown that focusing overly on extrinsic rewards

(like grades) is likely to lead to all sorts of outcomes that I don't wish for you (lower interest in the course material, lower learning, lower enjoyment).

Instructor Availability

I am readily accessible during business hours (9:00AM-5:30PM; Monday-Friday) via email/ LMS/ zoom/ carrier pigeon. Outside those hours, I do not typically respond to messages, in order to devote time to my family, rest, and living my life. Messages received during these times will receive attention once I am back online. Otherwise you can expect to receive a response to your message within 12 to 24 hours, often much sooner. If you do not hear back after 24 hours, please follow-up with me.

I have given out my cell-phone number, in the case of *true* emergencies. Please be mindful that poor planning on your part does not constitute an emergency for me.

Is it an true emergency?

How do you know if it is a true emergency?

- Ask yourself, would a reasonable person consider this situation an emergency?
- How would the situation change if you waited until morning?
- Could this situation have been prevented by starting earlier?
- Would Professor Mason really want to know about this situation *right now*?
- If you were in Professor Mason's shoes, would you consider this an emergency?

Public Health in the age of COVID-19

Each of us shares responsibility for the health and safety of all in a learning space. Maintaining a consistent six feet of distance; wearing a face covering; limiting our gathering sizes; and isolating or quarantining when ill or exposed to someone with the virus are Wake Forest University directives and policies we all must follow. Students are encouraged to visit the Our Way Forward website (ourwayforward.wfu.edu) to stay informed about the latest guidance and review the [Public Health Emergency Addendum to the Student Code of Conduct](#).

Specifically, in this room, we will mitigate the risks of virus transfer and take care of our community by abiding by the following safety directives:

- maintain six feet of distance at all times when feasible.
- wear a face covering for the entirety of class. This face covering should cover your mouth and your nose, and adhere to [our University face covering policy](#) (no face shields without masks; no neck gaiters; no bandanas; and no masks, including N95, with a one-way valve).
- stay out of class when sick or after being exposed to someone who is sick.

In this class, any student who does not follow these requirements will be asked once to follow the safety directives. I will offer you a mask or ask you to find one. If you do not comply, I will ask you to leave the class for that day. [I will also refer the matter to the COVID-19 compliance reporting system](#). Possible disciplinary actions may follow as described in the Wake Forest University Undergraduate Student Conduct Code Public Health Emergency Addendum.

Classroom Climate

I aim to create a learning environment for my students that supports a diversity of thoughts, perspectives, and experiences, and honors your identities (including race, ethnicity, sex, gender,

gender-identify, class, sexual orientation, religion, ability, political affiliation, etc.) To help accomplish this:

- If you have a name and/or set of pronouns that differ from those that appear in your official records, please let me know!
- If you feel like your performance in the class is being impacted by your experiences outside of class, please don't hesitate to come and talk with me. I want to be a resource for you.
- I (like many people) am still in the process of learning about diverse perspectives and identities. If something was said in class (by anyone) that made you feel uncomfortable, please talk to me about it.

Department Statement

The Psychology Department values, respects, and celebrates the experiences, beliefs, and practices stemming from varied cultures and circumstances (emphasizing, but not limited to, those from historically underrepresented groups), and our deep commitment to diversity, equity, and inclusion plays out through coursework, programming by majors, and research.

To do well in the course

To do well in the course, you should read the assigned material before class and re-read previously assigned material as the course progresses. By reading the text before class you will be better prepared to ask questions and integrate the content of lectures with what was presented in the text. For synchronous classes, be sure to attend all lectures and arrive on time. For asynchronous classes be sure to watch all the video lectures and don't leave them until the last minute. Each topic builds directly on the previous one. Thus, if you miss one lecture or zip through a video, you run the risk of being completely lost in the next lecture.

Important Information for College and This Course:

In addition, many professors have implicit (*i.e.*, unspoken) expectations for college classes. I'm going to explicitly state some of those unspoken expectations. I suspect that your other professors have similar expectations – so this information will help you in your other classes.

Asynchronous courses put the onus on **YOU** to keep up with the work. You are not guaranteed any reminders throughout the semester. Go to the schedule included here and put it in your calendar. You should also:

1. check course announcements on Canvas often, and
2. check your email tied to Canvas often.

Email and canvas is how I communicate with you, and I will not continually repeat myself in emails after I have already posted or sent the information.

High school and college are different. In high school, you may have been permitted to turn in work as late as you like, to redo assignments or quizzes until you were satisfied, and to complete extra credit work. This is not the case in this college-level course. Unless explicitly stated, there are no late assignments, make-up work, redoing of assignments, or extra credit. These are course policies; they are not opportunities for negotiation. Although I am always happy to explain the reasoning and calculus behind my policies, they are not negotiable.

There is also a prevalent attitude of, “it doesn’t hurt to ask.” Yes, it does. If I have already made clear my policies and expectations, asking me to violate them damages your credibility as a student. One day you may ask for something that is truly reasonable given an emergency situation, but by then your reputation will precede you. Do not be “the boy who cried wolf;” it is not a respected position.

Finally, you should understand that college is not a fee-for-service arrangement. You are not paying me. You are paying tuition to a University for all kinds of things, very little of which actually “pays my salary.” Salaries are more commonly paid out of government funds, including grants. You start with a zero in college courses and earn your points from there. I am not “giving” you grades or “taking away” points. You have nothing to begin with and earn your own score based on what you do and how well you do it (not simply on effort). What I offer you is an opportunity for education, not a grade.

Tentative Class Schedule

This syllabus is intended to give the student guidance in what may be covered during the semester and will be followed as closely as possible. Dates for tests and assignments won’t change, barring extraordinary events. However, I reserve the right to modify, supplement and make changes as the course needs arise. I try to avoid changes to the syllabus. Nevertheless, if changes occur, I will only make changes that are less burdensome and more advantageous to the students.

Week 01, 08/24 - 08/28 : Introduction

- Tuesday: Chapter 1
- Thursday: Chapter 2

Week 02, 08/31 - 09/04 : Historical, Ethical, and Social Considerations in Testing

- Tuesday: Chapter 18
- Thursday: Chapter 18

Week 03, 09/07 - 09/11 : Norms and the Meaning of Test Scores

- Tuesday: Chapter 3 “Last day to add full-term class”
- Thursday: Chapter 3

Week 04, 09/14 - 09/18 : Reliability

- Tuesday: Chapter 4
- Thursday: Chapter 4

Week 05, 09/21 - 09/25 : Validity

- Tuesday: Chapter 5 + 6
- Thursday: Chapter 5 + 6

Week 06, 09/28 - 10/02 : More Validity

- Tuesday: Chapter 6 “Last day to drop full-term class”
- Thursday: Chapter 9

Week 07, 10/05 - 10/09 : Item Analysis

- Tuesday: Chapter 7 (Assignment 1 Due)
- Thursday: Chapter 7

Week 08, 10/12 - 10/16 : Test 1

- Tuesday: Review
- Thursday: Exam 1

Week 09, 10/19 - 10/23 : Spring Break

- Tuesday: No class
- Thursday: No class

Week 10, 10/26 - 10/30 : Individual Differences

- Tuesday: Selected readings
- Thursday: Chapter 10

Week 11, 11/02 - 11/06 : Ability Testing

- Monday: Last day to drop with a grade of "W"
- Tuesday: Chapter 11
- Thursday: Chapter 12

Week 12, 11/09 - 11/13 : Personality Testing

- Tuesday: Chapter 13
- Thursday: Chapter 13

Week 13, 11/16 - 11/20 : Measuring Interests and Attitudes

- Tuesday: Chapter 14
- Thursday: Chapter 14 (Assignment 2 Due)

Week 14, 11/23 - 11/27 : Other Assessment Techniques

- Tuesday: Chapter 15
- Thursday: Chapter 16

Week 15, 11/30 - 12/04 : Modern Development and Applications of Testing

- Tuesday: Supplemental reading
- Thursday: Supplemental reading

Week 16, 12/07 - 12/11 : Review

- Tuesday: Review

Final Exam

- TBD
